

Clann Aire

Policy on sharing sensitive information like photographs or videos through Childpaths.

Childpaths was designed for you the parent, so you can communicate with your child about their day.

It is also a useful tool for you to communicate with our Childcare Practitioners if you wish to share any information about your child from home or work through your account.

Through the app you have an insight into your child's day be it through photos or video's or through communication from our practitioners how your child's day went from once they arrive in the morning until they depart.

To be able to capture the "moment" or a "story" to share with you and other parents we will be including other children's images in the photos. Please be aware that your child's image may be included in photos shared with other parents when relevant to a moment or story being told.

To be clear again any information shared through Childpaths is NOT on the internet: it cannot be viewed by anyone browsing the internet. The information shared from our tablets is encrypted & sent to servers in a secure hosting company in Dublin. The software is password and username protected.

Sample Form Parents will sign when their child begins at Clann Aire.

By signing up to Childpaths you accept and agree to abide by our ban on social media posting's through Childpaths.

You are required to cooperate with all investigations of alleged policy violations.

Signed by parent/Guardian: _____

Parents are NOT permitted to share any photos or video's they receive through Childpaths on social media.

This policy was adopted by Clondrohid Community Crèche Pre-School & after School Services.
